WHAT IS FOREX TRADING?

Forex trading (Foreign Exchange Trading or FX Trading) is the process of buying one currency while simultaneously selling another to profit from changes in exchange rates.

The forex market is the largest financial market in the world, with over **\$7 trillion** traded daily. It operates **24 hours** a day, **5 days** a week, allowing traders to participate from almost anywhere.

HOW FOREX TRADING WORKS

01 CHOOSE A CURRENCY PAIR

EUR/USD (Euro / US Dollar) • GBP/USD (British Pound / US Dollar)
USD/JPY (US Dollar / Japanese Yen) • AUD/USD (Australian Dollar / US Dollar)

02 ANALYZE THE MARKET

Traders study price charts, market trends, economic news, and technical indicators to predict whether a currency's value will rise or fall.

03 PLACE A TRADE

- **Buy (Long):** If you expect the base currency to increase in value.
- **Sell (Short):** If you expect the base currency to decrease in value.

04 EARN OR LOSE

Your profit or loss depends on how much the exchange rate moves after you enter the trade.
